“ We have received only
positive feedback from the
young people and parents
involved in the sessions. The
program has provided a variety
of great outcomes ”

Established in 2003, Filmbites provides specialist screen skills training
for young people, and is a multiple Australian Teachers of Media (ATOM)
award winner and nominee.

Filmbites Workshops

ELEMENTS OF DRAMA

Aligned with the WA Arts curriculum, these workshops cover voice, movement, role, space, situation, character, time, tension, mood and relationships in 50 minute modules.

This program has already been implemented in 5 primary schools with extremely positive reviews from both teachers and students. Visit our website for scheduling suggestions.

GREEN SCREEN VFX

Explosions, levitation, shrinking... this workshop has it all! Students devise short scenes with action elements and film their scenes. Depending on available facilities, editing is taught by demo, or using free or industry-standard software.

FILMMAKING

Choose from Make a Movie, Make a Music Video, Mobile Filmmaking and Vlogging workshops to bring your student's creative visions to life. All workshops include story, performance and technical elements.

SCREEN ACTING

Learn how stage acting is different to screen acting and techniques to achieve a natural screen performance. Longer workshops also include related elements such as acting with a camera crew and being an extra.

SCREEN PRESENTING

Learn how to use your breath, posture, eyes and hands to give your vlogs a professional edge. Also a great skill for class presentations, assemblies and debates.

MAKE-UP SFX

A fun fusion of art and science! Workshop options include Burns & Bruises, Forensic SFX, Latex Masks, Harry Potter, Horror/Halloween, Dr Who, Sugar skulls, Zombies, Ageing and theatrical makeup for stage.

GAME DESIGN

Learn how to make three different types of games using free software. A fun and inspiring way for younger students to learn about game design before they move on to coding.

2D & 3D ANIMATION

Create an animated gif, short animated sequence, or delve into the exciting world of 3D using free or industry standard softwares.
