

## Curtin University

### Mathematics Enrichment Classes 2021

Curtin University's School of Mathematics and Statistics will be running their Mathematics Enrichment Classes again this year for students in years 5 – 11.

The main aim of the program is to increase student's interest in mathematics by engaging in activities that develop a sound mathematical understanding and to engage in challenges that will enhance the mathematical problem-solving skills of the students. These skills are essential in preparing and equipping our students to the challenges they face in the modern technology focused economy. The program is suitable for a broad range of mathematically talented students. Students will be issued with a certificate upon completion of the course.

The topics covered by the program are selected to complement the school curriculum and to challenge students with some non-standard problems. The course presenters are drawn from the WA mathematical community. The Course Director, Professor Lou Caccetta, is an outstanding mathematical scientist who is recognised nationally and internationally for his excellence in Teaching and Learning and Research and Development.

The classes are intended for able, but not necessarily brilliant, students. However, we point out that the program is not intended for weak students who need remedial studies.

The classes have been scheduled in Terms 2 and 3 (starting the week of Monday, 17 May 2021). As we need to observe COVID restrictions, **places are limited and will be filled on a first come, first served basis**. Please note that in the event of any lockdown due to COVID classes may run into Term 4.

The registration fee is for the 16 week course and is NON-REFUNDABLE once the classes start. (There is no fee reduction for late enrolments.)

#### Fees:

- New student first enrolment: **\$352**
- New student additional enrolment (from the same family): **\$317** – a 10% discount applies for subsequent enrolments from the same family. This only applies to the second child onwards, the additional discount does not apply for a re-enrolment registration.
- Re-enrolling student (student previously enrolled in 2019): **\$297** – a 20% discount

All fees are GST inclusive.

**Please note: Cash payments are not accepted.**
