

CHANGE THE WORLD IN THREE WEEK PROJECT

LA 27, Year 3 are passionate about saving the world's environment so that we live in harmony with the land, environment, nature and people.

WE ABSOLUTELY MUST STOP USING SO MUCH PLASTIC!

Plastic is destroying our beautiful, pristine oceans. There are more than 5 trillion (5,000,000,000,000) plastic bags already floating in the oceans. In a few years there will be more plastic than fish in the ocean! Can you imagine a future where kids and grandchildren will be swimming in plastic-filled oceans? Is this a world you want? Do we want to live in a world with dying, innocent marine animals, strangled by our discarded, convenient plastic?

Why aren't we caring about our unique, precious, amazing world? People don't think and just use plastic for everything because it is easy and convenient. It all ends up in landfill or beaches or oceans and single-use plastic bags take 1000 years to break down. Even then, plastic becomes microplastics that are even more dangerous to wildlife, our oceans and humans as well. Surely you would never want to see your kids waking up with a 'rush of grief' wondering about their polluted world. (Rush of grief is a phrase used by Margaret Wild in her wonderful picture book, 'Fox').

Respect the world. Respect yourself.

Will you help us to save the marine animals; to save nature; to save the world? Please think every time you buy something wrapped or stored in plastic. There are many ways we can really make a small change that makes a vast difference.

For some ideas, check out the Plastic Free July website.
